Dear Mr. Brown:

The Subcommittee is attempting to locate a DOE study prepared, as we understand it, at the direction of -- or even directly by -- the Nevada Operations Office. According to "Objectives" set forth in the RADIOLOGICAL SURVEY PLAN FOR THE NORTHERN MARSHALL ISLANDS, Department of Energy, August 22, 1978:

A study has identified 11 atolls and 2 islands as those most likely to have received fallout from one or more nuclear tests conducted at Bikini and Enewetak during the U.S. Pacific testing program.

Would you kindly provide the Subcommittee with a copy of this study referenced in the Survey Plan as soon as possible.

Many thanks.

Sincerely,

RON DE LUGO
